

PRESS RELEASE

Cologne, 23 January 2018

DEUTZ Corporation showcases extensive engine portfolio and new wider range of service solutions at World of Concrete 2018

- New in-line engines from 9 to 18 litres
- Xchange engines are an economical and eco-friendly alternative to new engines
- DEUTZ Service Locator: quickly find contact details for DEUTZ dealers

DEUTZ's US subsidiary, DEUTZ Corporation, Georgia (USA), is exhibiting from 23 to 26 January at World of Concrete 2018 in Las Vegas. It will be joined at this annual trade fair for the global construction industry by 1,500 other exhibiting companies.

Among the engines that DEUTZ will be showcasing this year from its extensive range are the TCD 2.9, TCD 3.6 and TCD 4.1 models, which have been big successes in the US market. The compact TD 3.6 Power Pack for mobile machinery will be particularly interesting to customers who prefer a ready-to-install solution.

In addition DEUTZ will be extending its portfolio in the higher output range from 2019, with four new in-line engines from 9 to 18 litres capacity. The TCD 9.0 four-cylinder engine delivers 300 kW of power and generates 1,700 Nm of torque. The TCD 12.0 and 13.5 are six-cylinder engines producing, respectively, 400 kW of power and 2,500 Nm of torque, and 450 kW of power and 2,800 Nm of torque. The new TCD 9.0, 12.0 and 13.5 models share a common platform concept with a high degree of parts commonality, approaching 65 percent. This concept reduces the service and training complexity and simplifies spare parts stocking. The engines also share customer interface points, with identical front and rear configurations which simplify the integration and servicing of the engines considerably.

At the top of the range, DEUTZ will be offering the TCD 18.0 six-cylinder engine with 620 kW and 3,600 Nm. This is targeted particularly at heavy construction equipment with high power and torque requirements.

DEUTZ will also be presenting its reconditioned Xchange engines. DEUTZ Xchange engines undergo a thorough refurbishment, making them an affordable and eco-friendly alternative to purchasing a new engine. The engines and parts do not compromise on functionality or safety. In terms of quality, they have to meet the same standards as apply to the manufacturing of new engines. That is why DEUTZ offers an identical guarantee for its Xchange products.

A further highlight will be the DEUTZ Service Locator app. This gives customers of the DEUTZ Corporation in the US a means of quickly finding the contact details of their nearest authorised DEUTZ dealer. Visitors to the DEUTZ stand will also be provided with all the information they need about genuine spare parts, lubricants and coolants and the DEUTZ Corporation's value added services, which see the company provide rapid, customised drive solutions that are tailored to the specific needs of OEMs.

“When we attend World of Concrete, we not only get a chance to connect with our customers, but we can also gain a sense of how well our engines are performing in the field,” said Robert Mann, DEUTZ Corporation president and CEO. “Getting product reviews and perspectives first-hand is key to improving our service network and ensuring proper support for our engines and the professionals who operate them.”
