

Genuine DEUTZ Cooling System Conditioner

Protection all year round.

Genuine DEUTZ coolant ist specifically engineered to ensure the performance, reliability and durability that our customers demand!

The benefits of Genuine DEUTZ Coolant

- Formulated to suit all materials inside the DEUTZ engine
- Reliably prevents corrosion, cavitation and freezing
- Replacement only necessary every two years
- Free of nitrites and amines, silicates and phosphates
- Characterized by low maintenance requirements

All liquid-cooled engines require an effective product to ensure long-term conservation of the engine's cooling system. Reliably prevent corrosion, cavitation and freezing in all fast running engines with Genuine DEUTZ cooling system conditioner.

Usage instructions

Proportion of Cooling system conditioner	Antifreeze protection down to
min. 35 %	-22 °C
40 %	-28 °C
max. 50 %	-41 °C

The use of unsuitable cooling system conditioner often leads to leakage of the cooling system due to corrosion and incompatibility with the sealing materials. Pitting corrosion of aluminum components can, in the worst case, result in severe engine damage.

Counteract this!

Product program

Part no.	Description	Package Size
0101 7990	DEUTZ cooling system conditioner DQC-CB	5 liter canister
0101 7991	DEUTZ cooling system conditioner DQC-CB	20 liter canister
0101 7992	DEUTZ cooling system conditioner DQC-CB	210 liter canister
